

FIELD SEARCH SOFTWARE CERTIFICATION
TRAINING:MO POST#24798

Learn what to do when a computer may matter.

Certification training for police, probation, parole, community corrections and other qualified law-enforcement professionals. One day training class provided by experienced CFSI-“Certified Field Search Instructor”.

Product designed for use in the field by nontechnical criminal justice personnel, allows users to quickly and efficiently search a target computer and create a detailed report of the findings.

FIRST-RESPONDER DIGITAL TRIAGE

October 15th, 2026 | 9:00 AM–3:30 PM
O’Fallon Police Department • 1019 Bryan Road,
O’Fallon, MO 63366 (Training Room 2053)

Practical • Hands-on • Field focused

www.ekitsupply.com

A computer can become part of the case in seconds.

The first responder needs a structured, defensible way to determine what happens next.

1

ENCOUNTER

A computer or removable device may contain relevant information.

2

TRIAGE

Quickly determine whether the device warrants further attention.

3

DOCUMENT

Organize findings into a clear, usable report.

4

ESCALATE

Recognize when advanced forensic support is appropriate.

Field Search is designed for initial field review. It is not a full computer-forensics application.

Originating as a tool for probation officers, over the last 15+ years Field Search has grown and become recognized worldwide as a reliable, user-friendly tool for law enforcement, probation, and military operations with over 32,000 downloads and an estimated 12,000 officers trained. Field Search Software is free to active law enforcement and was initially funded by the NIJ NLECTC-CCOE. It is now a cooperative volunteer project between KB Solutions, Silent Shield, and NLECTC.

Course materials that leave with each participant.

Software and supporting resources are included for qualified government use.

01	FIELD SEARCH v5.2	Licensed copy included/ compatible with Windows & phone link technology
02	4GB USB DRIVE	Software/ pdf. manual and course materials
03	15+ SUPPORTING TOOLS	Including hashing and geolocation utilities
04	COURSE CERTIFICATION	Provided after successful completion
05	HANDS-ON EXPERIENCE	Mobile lab and case studies

No hidden costs or recurring software fees are listed in the course information.

A practical first step for digital evidence.

Designed to help authorized personnel review a live computer and identify potentially relevant information. It can alert authorities to a new crime, such as possession of child pornography or is particularly useful in the management and monitoring of sex offenders computer use.

Portable

Can be launched from a USB drive.

Search focused

Review browser history, files, media, and text-search results.

Report ready

Collect and organize selected information into a detailed report.

Field oriented

Built for qualified users who are not computer-forensics specialists.

Use only with proper authority and in accordance with agency policy, applicable law, and evidence-handling procedures.

Leave ready to apply a repeatable field workflow.

The course translates software features into practical steps officers can use in authorized operations.

Launch & navigate

Open the application and move confidently through the core interface.

Locate information

Use keyword, file, media, browser, and removable-device review capabilities.

Review & select

Identify information that may be relevant to the investigation or supervision activity.

Collect & export

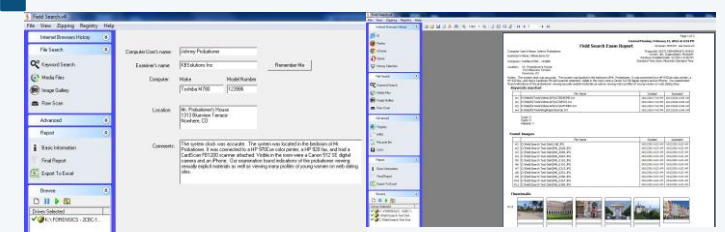

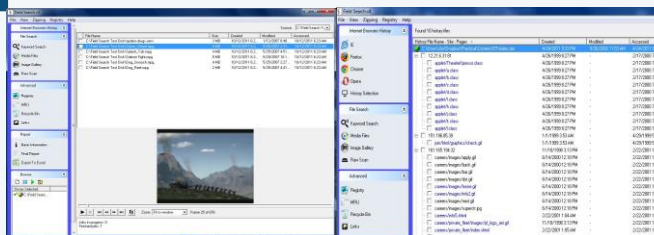

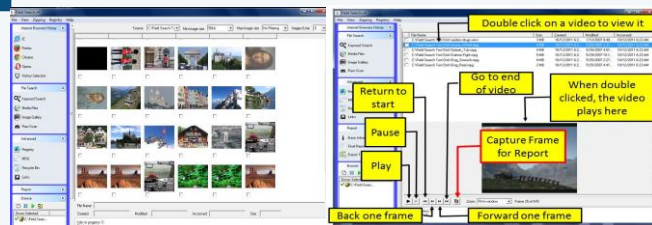

Organize selected findings and export critical information.

Build the report

Create a structured report that communicates what was reviewed and found.

Know the limits

Understand the role of triage and when specialist support may be appropriate.

One tool. Multiple operational settings.

Training examples connect digital triage to the realities of law enforcement and community supervision.

PATROL & DETECTIVES

Initial case review when a computer or storage device may contain relevant information.

SPECIALIZED UNITS

Search for case-related names, addresses, account details, documents, images, and online activity.

PROBATION & PAROLE

Authorized review of computer activity related to supervision conditions.

SCHOOL & COMMUNITY SAFETY

Review agency-authorized devices involving policy, safety, or investigative concerns.

THE TRAINING EXPERIENCE

Hands-on learning, not a software lecture.

- ✓ Instructor-led software demonstrations
- ✓ Mobile computer lab exercises
- ✓ Realistic investigative case studies
- ✓ Practice reviewing and reporting findings
- ✓ Certificate of completion after successful course completion

Designed to build confidence before the next computer becomes part of an investigation or supervision activity.

Equip your team for the digital evidence they encounter.

Bring Field Search Software Certification Training to your agency or register qualified personnel for an upcoming course.
Cost \$495.00 per student.

WHO SHOULD ATTEND

**Police officers • Detectives • Probation and
Parole officers • Community corrections
professionals • Specialized investigators •
